DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to insulating tapes, classified in class 174, subclass 106R.
 - II. Claims 21-22, drawn to a method of wrapping an electrical conductor, classified in class 156, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as one where the inner layer of a conductive material is a material other than glass tape, where the inner layer is coated and not wrapped around the conductor, where the slip layer does not include a conductive interweave interwoven with the slip layer, where the outer layer of a conductive material is a material other than glass tape, where the outer layer is coated and not wrapped around the conductor, where there is no impregnating of the tape with a resin that is cured. Additionally, the product as claimed can be made by another and materially different process such as by coating the inner and outer conductive layers instead of

wrapping, simultaneously wrapping all the layers together, without the step of impregnating and curing a resin, etc.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Elsa Keller on November 2, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
